

HI!

Welcome to the world of outdoor blimps - the innovative and efficient solution for monitoring farms from above!

Our outdoor blimps are the perfect tool for farmers looking to protect and observe the animals that live on their farms. With advanced camera technology, our blimps offer unparalleled insight into your animals condition. This allows you to make informed decisions and take quick action when necessary to ensure the safety and well-being of both your lovely animals.

History

We are a group of 5 energetic and youthful people that founded this business that specializes in building outdoor blimps for tracking the activity and movement of animals on sizable farms.

We saw a need for a more efficient and effective way to monitor the health and wellbeing of farm animals, which led us to develop our outdoor blimps. With our expertise in technology and design, we created blimps that are equipped with advanced cameras and real-time data analysis capabilities. These blimps offer unparalleled insight into the conditions of farms and the behavior of animals, allowing farmers to make informed decisions and take quick action when necessary.

Blimp

Our blimps can fly at heights of up to 500 feet, providing you with an aerial view of your farm's animals without causing any disturbance.

With our outdoor blimps, you can:

- Monitor your animals' movements and behavior patterns to ensure they are healthy and well-fed.
- Detect potential issues early and take preventive measures to protect your animals from disease outbreaks or other threats.
- Save time and resources by covering large areas of your farm quickly and efficiently.

"An Eye In The Sky"

Our outdoor blimps are perfect for all types of animal farms, from small family-owned businesses to large commercial operations. By investing in our monitoring solutions, you can improve your farm's efficiency, ensure the safety and well-being of your animals, and achieve better results in your livestock farming.

Contact us today to learn more about our outdoor blimps and how they can benefit your farm of animals.
